

Visa Policy

All students can check if they need a visa to come to study in the UK using this UK Government website: <https://www.gov.uk/check-uk-visa>

All students coming to MDA College must obey the visa regulations of the UK. These regulations will change depending on their country of origin, their status, the amount of time they want to stay and other factors. Each student is responsible for finding the correct information that they need before they try to come to our College. MDA cannot take responsibility for any rejected visas. MDA can only help with visas for MDA students.

Students must give full and accurate information to MDA at all times during the application process, and this is especially key with students requiring a visa. If a student sends incorrect or incomplete information, it is likely that MDA will not be able to process their application or the visa will be rejected. Students may be recommended to use a partner agency who can help with the visa application. This is only a suggestion and students who do not choose to use that service will not be penalised in any way.

Please see our Admission Policy for more details. All students on a visa attached to MDA must abide by UKVI regulations and be aware that any problems or issues will be reported to UKVI. Please see our Reporting to UKVI Policy for more information.

Short term study visas

MDA can only help by providing proof of study for a Short-Term Study visa.

Students can find out more information about the conditions of a Short-Term Study visa here: <https://www.gov.uk/study-visit-visa>

Students must follow all of the conditions of their Short-Term Study visa at all times during their stay in the UK.

Standard Visitor visa

Students can study at MDA College for a maximum of 30 days (6 week booking) while they are in the UK on a Standard Visitor visa. Study should not be a main reason they are in the UK.

Students can find out more information about the conditions of a Standard Visitor visa here: <https://www.gov.uk/standard-visitor-visa>
